

## MODULE 12: HOW TO DO A VIDEO

# Objective

The objective of this module is to give the participant an idea of how to do their video. It is also intended to be a catalyst for the participants to start exploring the internet to get ideas for their research.

The organisers are hoping that you as the participant will be able to produce a well researched video with reference and evidence for your recommendations.

# Introduction

YIJ Video category competition is an online competition where the students, either individual or a team of no more than 5 person present their video based on their research.

The video can be based on any one of the 4 academic types of papers. Kindly refer to YIJ Paper Competition Modules to know more about the content of the type of papers.

After doing your research and needed work, **Instead of writing a paper, you present your ‘paper’ in recorded video.**

Each video that the individual/team is going to upload should be **in 3 to 7 minutes** long.

The video can be recorded using their mobile phones. We are not looking for a ‘Hollywood’ type production, but it is important that the voices are clear and the quality of the images are discernible.

Your video does not have to be as detailed as a paper but must have the academic research element of writing a paper.

# List of Modules for reference

Below is list of YIJ paper competition modules which you can refer to for your video research and production.

- Module 2 - A General Guide to ASTI Paper Writing Competition
- Module 3 - Guide to Form a Research Problem Statement

# Free Online Audio Editing Links

**bearaudio**

<https://www.bearaudiotool.com/>

A brand new online audio editing tool that is based on HTML5 and doesn't require you to upload audio files to the server.

Main functions:

- Cut and delete audio
- Combine audio, songs, and ringtones together
- Fade in and fade out audio
- Mute and adjust volume
- Supported import formats: MP3, WAV, OGG
- Export format: WAV, MP3, M4R, OGG, AAC, WMA

**TWISTEDWAVE**

<https://twistedwave.com/online>

TwistedWave is a browser-based audio editor. You only need a web browser to access it, and you can use it to record or edit any audio file.

All the audio is stored and processed on the server, so you don't need to download anything, or save your work when you are done. Close your browser window and your work is saved. Open TwistedWave somewhere else, and all your audio files, with the complete undo history, are still available.

Audacity audio editor online

<https://www.offidocs.com/index.php/desktop-online-video-audio-apps/audacity-audio-editor-online>

Audacity for OffiDocs is a free online audio editor as good as many premium paid-for applications. It can be used to import your own audios, remove noise, cut and combine clips, apply special audio effects and much more, and achieve professional results. Audacity online has multiple audio effects and integration with other applications. Whether you are making music, podcasts, or audio books, Audacity in OffiDocs is a very good tool to edit audios or music online.
